M/800 Heavy duty flow regulator Uni-directional G1/8 ... G1

Line mounted general purpose regulators
Captive regulating needle will not blow out when unscrewed
Calibrated adjusting knob, can be locked
Suitable for wall mounting
High operating pressure

Technical features

Medium:

Compressed air, filtered, lubricated or non-lubricated **Operation:**

Heavy duty flow regulators (uni-directional)

Operating pressure:

0,3 ... 16 bar

Port size:

1/8", 1/4", 1/2", 3/4", 1"

Mounting:

Line mounted

Fluid/Ambient temperature:

-20 ... +80°C max. (alternative models to 150°C) Air supply must be dry enough to avoid ice formation at temperatures below +2°C.

Materials

./836, ./837, ./839

Body, adjusting knob and locking

ring: brass Seals: NBR ./840, ./855

Body, adjusting knob and locking

ring: aluminium Seals: NBR

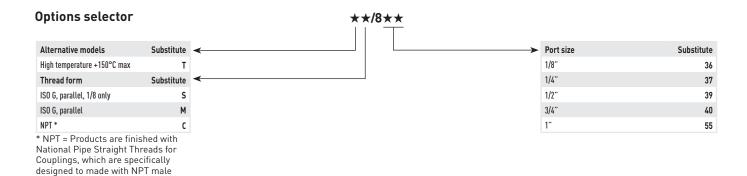

Technical data, standard models

| Symbol | Port size | Max. regulated flow factor | | | Free flow factor | | | Metered/ free flow | Weight | Spare kit | Model |
|---------------|-----------|----------------------------|------|--------|------------------|-----|--------|-----------------------|--------|-----------|-------|
| | | C *1) | Cv | Kv *2) | C *1) | Cv | Kv *2) | at 6 - 5 bar | (kg) | | |

Warning

These products are intended for use in industrial compressed air systems only. Do not use these products where pressures and temperatures can exceed those listed under **>Technical features**«.

Before using these products with fluids other than those specified, for non-industrial applications, life-support systems, or other applications not within published specifications, consult NORGREN.

Through misuse, age, or malfunction, components used in fluid power systems can fail in various modes.

The system designer is warned to consider the failure modes of all component parts used in pneumatic systems and to provide adequate safeguards to prevent personal injury or damage to equipment in the event of such failure.

System designers must provide a warning to end users in the system instructional manual if protection against a failure mode cannot be adequately provided.

System designers and end users are cautioned to review specific warnings found in instruction sheets packed and shipped with these products.
